

4. Valle de Vallibierna

'IBÓN DE LLOSÁS' (LITTLE LAKE OF LLOSÁS)

1 hour 30 min.

The departure point is the refuge of *Coronat* at the end of the trail of *Vallibierna*, which has to be taken near the camping area close to the *Paso Nuevo* dam.

Follow the remains of a trail that goes to the valley on the right. The trail joins a well-planned track, which goes to the *Pleta de Llosás*, where you will get in about 30 minutes. Then follow the track on the left of the slope till you get to the *Ibón de Llosás* (2,490 m. high), which is just under the peaks *Aneto*, *Tempestades* and *Rusell*.

Follow the right bank of the *ibón*, come up the first ravine and you will get to the *Ibonet de Llosás* in 10 minutes.
